

**MUTUAL RECOGNITION ARRANGEMENT ON CONFORMITY
ASSESSMENT OF ELECTRICAL AND ELECTRONIC EQUIPMENT**

**APEC EEMRA
Information Interchange Format**

PART 1

Introduction

This format is being prepared to assist member economies participating in the APEC MRA to prepare documentation required for participation in a consistent format.

It is expected that each participating member economy would submit their information in the recommended format to the APEC Secretariat as required by the MRA.

The format is based on the Information Notes on Good Practice for Technical Regulation and therefore provides for information to be supplied for each of the regulatory regimes identified in the notes. There are 7 regimes, they are for products requiring inspection, products requiring licensing, products requiring batch testing, products requiring approval (or certification), products requiring listing or registration, supplier declarations and essential safety requirements. Participating member economies need only provide information relating to the regimes which are in force in their economy. The regimes that are not enforced by the economy need to be noted also, please indicate this by placing 'none' in the standards table on the front of each regime.

Where more than one regulatory system applies within a participating member economy information on each regulatory system should be provided separately.

The format also draws upon the survey on Conformity Assessment of Electrical and Electronic Equipment conducted by the APEC SCSC. The format includes reference to applicable international standards and uses the international convention for describing the relationship of national and international standards, i.e. IDT for identical, MOD for modified, and NEQ for not equal.

When information makes reference to documents or legislation, the documents or legislation should be available on a website for that economy or provided as part of the information supplied to the APEC Secretariat.

ECONOMY – (*Member Economy*)

PART I – INFORMATION EXCHANGE

Regime Overview

The Compulsory Product Certification System (hereinafter referred to as CPCS) is applied to products related to human life and health, animals, plants, environmental protection and national security in People's Republic of China.

With regard to CPCS, for import and domestic products, one Catalogue of Products Subject to Compulsory Product Certification (hereinafter referred to as the Catalogue), one set of applicable technical regulations, national standards and conformity assessment procedures, one obligatory mark have been announced for statutory implementation.

Any product covered by the Catalogue must first be certified by a certification body designated by relevant competent authorities. From Aug 1st, 2003, the Catalogue product must obtain the certificate and be applied the certification mark before it can be marketed, imported or used for any commercial purposes. From Oct 1st, 2018, Self Declaration of Conformity (SDoC) can be applied to certain products.

Authorized by the State Council, Certification and Accreditation Administration of P. R. China (CNCA) is in charge of nation-wide certification and accreditation activities.

For further information about the Compulsory Product Certification System and CNCA, please visit the website <http://www.cnca.gov.cn/>

Legislative References

Legislation Applicable	Scope of the Legislation	Government Agency

Regulations of the People's Republic of China on Certification and Accreditation	Certification and Accreditation	CNCA
Regulations on Product Certification	Product certification	SAMR CNCA

1. PRODUCTS REQUIRING INSPECTION

An inspection regime involves the assessment of each individual product for compliance with technical standards or regulators.

2. PRODUCTS REQUIRING LICENSING

Licensing individuals or companies is a conformity assessment regime that assesses the competence of an individual or a company to undertake a specific task.

3. PRODUCTS REQUIRING BATCH TESTING

A batch testing regime involves a sample test of each batch or shipment of mass produced product. A batch testing regime may also require initial type testing as a prerequisite.

4. PRODUCTS REQUIRING APPROVAL (OR CERTIFICATION)

An approval regime requires the assessment (type testing) of a sample or samples for compliance with a standard or specification by a “Regulator” or assessment agency recognised by a regulator. In some economies approvals issued by other “Regulators” may be recognised.

Products can not be sold, or imported, until an “approval” is issued for that product.

Products are generally required to be marked or labelled to indicate that they are covered by an approval.

5. PRODUCTS REQUIRING LISTING OR REGISTRATION

Listing/registration is similar to approvals except that there is no direct activity by the regulatory agency before a product is placed onto the market.

6. SUPPLIER DECLARATIONS

A supplier declaration regime requires a supplier in that economy to formally take responsibility for the compliance of the product/products. It may require compliance with particular standards and will require the supplier to hold relevant compliance documents for subsequent audits. A supplier declaration regime may also include a marking regime.

7. ESSENTIAL SAFETY REQUIREMENTS

An essential safety regime requires that products comply with recognised fundamental safety requirements (essential safety). The regime may include standards which are recognised to achieve the essential safety requirements.

Products covered by any of the above

Products covered by approval

Diagrammatic representation or flowchart of the regime

Description of the Regime

Testing Facilities

NO.	Name of Testing facility	Certification Implement Rules for Product in the Designated Business Scope	Address and Communication
1.	China Electronics Standardization Institute (CESI) Safety and EMC Testing Center of Electronic Industry	CNCA-C08-01: Audio & Video Products CNCA-C09-01: Information Technology Equipments CNCA-C16-01: Telecommunication Terminal Equipment	No. 8 Tongjin South Road, Yizhuang, Beijing Economic and Technological Development Zone Contact: Qi Jianhua Tel:010-64102095 E-mail:qijh@cesi. cn
2.	The Third Electronic Research Institute of Ministry of Information Industry (National Testing and Inspection Center for Radio and TV Products)	CNCA-C02-01: Switches for Circuit, Installation Protective and Connection Devices CNCA-C07-01: Household and Similar Use Appliances CNCA-C08-01: Audio & Video Products CNCA-C09-01: Information Technology Equipments CNCA-C10-01: Lighting Electrical Appliances CNCA-C16-01: Telecommunication Terminal Equipment	No. 7 B, Jiuxianqiao North Road, Chaoyang District, Beijing Contact:Wu Xin Tel:010-59570588 Fax:010-59570553 E-mail:wuxin@tirt.com.cn Website Address:www.tirt.com.cn Postal Code:100015
3.	Beijing TIRT Technology Service Co., Ltd.(Suzhou)	CNCA-C10-01: Lighting Electrical Appliances	No. 588, Wutaishan Road, Science and Technology City, High-tech Zone,Suzhou Contact: Zhang Guyi Tel:0512-67376151
4.	Shanghai Institute of Quality Inspection and Technical Research	CNCA-C01-01: Electric Wires & Cables	918 Wanrong Road, Jing'an District, Shanghai Contact: Sun Ronghua, Xie Jun Tel:021-56033469;021-56651849 Fax:021-56033469 E-mail:sunrh@sqi.org.cn;xiejun@sqi.org.cn Website Address:www.sqi.org.cn Postal Code:200072
		CNCA-C02-01: Switches for Circuit, Installation Protective and Connection Devices	900 Jiangyue Road, Shanghai Contact:Shi Qiang, Wang Jing, Liu Hong Tel:021-64336605;021-54336292;021-54336280 Fax:021-54336281;021-64313348

Labeling Requirements

The Regulations for Compulsory Product Certification Mark has been announced by CNCA on December 3, 2001, it is available, in Chinese and English language, at the website www.cnca.gov.cn.

Regulatory and Legislation Requirements

<describe any other regulatory and legislation requirements that need to met in order to market electrical and electronic equipment including validity time

Mains Voltage, Frequency and Mains Plug Configuration

Country	Mains Voltage And Tolerance	Mains Frequency And Tolerance	Applicable Legislation	Mains Plug Configuration				
				Domestic Standard	Please tick box if mandatory	Relevant International Standard	Extent of Alignment	Diagram of Mains Plug Configuration-
P. R, China	220 volts single phase	50 Hz						
	380 volts three phase tolerance	50 Hz
